

HQS SERIES: GUMMY COUNTING AND FILLING SOLUTIONS

Bottle filling conveyor
with single or
dual track

HQS 1250
12-channel gummy
counting machine

HQS 1250 + Spee-Dee®
Compact rotary filler

2x HQS 1250 + Spee-Dee®
High-speed rotary filler

CREMER'S VERSATILE PRODUCT COUNTING SYSTEM WITH A SLIM BOTTLE CONVEYOR OR COMBINED WITH SPEE-DEE'S ROTARY BOTTLE FILLERS FOR PERFECTLY DOSED VITAMIN GUMMIES EVERY TIME!

Basic system concept: HQS-series 12-channel product counting machine for precise counting and dispensing of nutraceutical vitamin gummies into rigid containers of many sizes, shapes and types.

- Standard or fully customized.
- 100% counting accuracy
- Fast and efficient
- Consistent output and quality
- Silent operation
- Low maintenance, high reliability
- Ease of operation and cleaning
- Tool-free changeover
- FDA-compliant contact parts
- Optional product residue filtering

Typical output data at a glance:

| | |
|---|-------------------|
| Counting capacity per counter | 6000 gummies/min. |
| HQS 1250 + Bottle conveyor | 50 bottles/min.* |
| HQS 1250 + Compact rotary filler | 75 bottles/min.* |
| 2x HQS 1250 + High-speed rotary filler | 150 bottles/min.* |

*Actual output always depends on the number of gummies per bottle.

COUNT ON PRECISION. CREMER COUNTING MACHINES FOR PERFECTLY DOSED VITAMIN GUMMIES EVERY TIME.

**ACCURATE COUNTING,
BETTER NUTRITION,
HEALTHIER CONSUMERS**

Vitamin gummies have become an increasingly popular way to supplement one's diet with essential vitamins. These gummies come in a variety of shapes and sizes and are typically sold in bottles containing a specific number of gummies. As with other dietary supplements, these vitamin gummies are regulated by the U.S. Food and Drug Administration under the Dietary Supplement Health and Education Act, which mandates that manufacturers must ensure that each bottle contains the precise number of vitamin gummies as listed on the product label.

Precise counting and dispensing of gummies is a technically challenging process due to their variations in size and shape, their sticky and sugary coating, cross-contamination, hygiene and sanitation. At Cremer, we understand the importance of complying with FDA regulations and producing high-quality vitamin gummies that meet the needs and expectations of consumers. That's why we have developed a series of cutting-edge counting machines that are designed to meet the highest standards of accuracy and efficiency, ensuring that each bottle contains the right number of gummies!

**PRECISION COUNTS:
QUALITY STARTS WITH
CONSISTENT DOSING**

Counting the vitamin gummies rather than weighing them, allows our customers to ensure that each bottle contains the same number of gummies, regardless of slight weight or size variations. We understand that consistency is key when it comes to dietary supplements, which is why our counting machines are built to handle vitamin gummy in almost any shape or size with 100% counting accuracy. With our counting machines, you can feel confident that your vitamin gummies are accurately and consistently dosed, meeting the needs of your customers and exceeding industry standards.

Introducing the perfect partnership for your vitamin gummy packaging needs: our gummy counting machines and Spee-Dee's rotary bottle filling machines have teamed up to bring you an unbeatable solution for your vitamin gummy production line. Our counting machines have been designed to accurately count and dispense your gummies, while our partner's rotary filling machines expertly fill your bottles with precision and efficiency. Together, we can streamline your gummy packaging process and help you meet your production goals!
